## Uses

Relief of nicotine withdrawal symptoms in nicotine dependency as an aid to smoking cessation.

## Format and Ingredients

Lozenge containing:  
Nicotine 2mg,

## Dosage

Users should stop smoking completely during treatment. For smokers of more than 30 cigarettes a day. For those smoking between 20-30 cigarettes a day either the 1mg or 2mg lozenge may be used depending on personal preferences and characteristics. 18 years and over: 1 lozenge to be sucked when the urge to smoke is felt following the sucking technique on the pack. Initially 1 lozenge to be taken every 1-2 hours. The usual dosage is 8-12 lozenges per day. Maximum 15 lozenges in 24 hours. Do not exceed one lozenge per hour.
