Uses

Provides maximum protection in areas with a high risk of malaria and other insect transmitted diseases, with a maximum strength Insect Repellent Factor (IRF) 4. Provides up to 9 hours protection.

Format and Ingredients

Insect repellent containing:

Deet 50%,

Dosage

12 years and over: apply carefully to exposed skin, except the eyes and lips. For use on face spray into palm of hand before applying. Factors such as high temperature, humidity and transpiration can influence the duration of protection of all insect repellents. Repeat application after swimming, showering or when the efficacy decreases.
